PROFILE

Hands-on product engineer building web and mobile systems for payments, identity and business operations. Works across application interfaces, APIs, data models, integrations and release operations. Current work includes AddressDox and PlotDox workflows, RewaPay financial services and KoletMoni mobile payments. Brings practical experience translating business requirements into maintainable software and documenting how it is operated.

CORE EXPERTISE

Application engineering: TypeScript, JavaScript, React, Next.js, Node.js, NestJS, Express, PHP, Laravel, Flutter

Data and delivery: PostgreSQL, Supabase, Redis, REST APIs, Docker, GitHub Actions, Azure, automated tests

Product work: Payment integrations, role-based access, data migration, operational tooling, technical documentation

RECENT EXPERIENCE

AddressDox | Senior Software Developer

Apr 2026 - Present | Remote from Nigeria for South African employer

- Develop proof-of-residence and land-administration workflows across AddressDox and PlotDox, with role-aware onboarding, document issuance and shared product access.
- Work across React and TypeScript interfaces, Supabase-backed services, payments, messaging and migration tasks for a South African product team.
- Maintain release documentation covering versioned deployments and rollback, and test sensitive product handoffs and redirect behavior.

RewaPay | Chief Technology Officer

Dec 2025 - Present | Concurrent early-stage role

- Lead implementation of the wallet platform across a NestJS API, administration tools and mobile integration, preserving existing client API contracts.
- Implement balanced ledger entries, exact money arithmetic, transaction locks and independent approval controls; add coverage for replay, reversal and audit-write failure cases.

Eminify | Founder and Lead Engineer

Nov 2019 - Present | Client and internal product work

- Translate client and internal product requirements into web applications, mobile workflows, APIs and operational handover materials.
- Build KoletMoni payment flows and validate API compatibility across Node.js and Laravel implementations.

EARLIER EXPERIENCE

Qubators | Head of Technical

Nov 2021 - Jul 2024

Led technical delivery across web and mobile products, including payment and digital-currency exchange workflows.

Bilaad Realty Limited | Senior Officer ICT

Nov 2018 - Dec 2021

Supported Odoo migration, developed a client QR web application, managed ICT operations and documented the transfer of systems and support responsibilities.

Resident Fintech Limited | CTO and Software Engineering

Engagement documented in 2020 - 2021

Built B2B application authentication, database schemas, payment-gateway reporting and API integrations.

Humber International Limited | Frontend Development and Technical Delivery

Contract | 2014 - 2019

Designed and developed business websites and web interfaces through contract engagements.

Niger State Development Company | Team Lead ICT

Nov 2011 - Sep 2018

Coordinated ICT operations, supported internal systems and worked with clients on technology and deployment needs.

Hecfirm Nig. Ltd | UI and UX Designer

Part-time | Aug 2009 - Nov 2010

Designed website interfaces and prototypes.

SELECTED ENGINEERING WORK

KoletMoni | Flutter, Node.js, Laravel, PostgreSQL

- Develop phrase-based payments, QR cash, wallet and bank-provider workflows across mobile and backend components.
- Handle transaction deduplication and reconciliation; cover repeated QR-cash expiry with a test that verifies one refund and clears escrow.

EMIWARP | Rust, Python, shell | Active open source development

- Develop configurable agent-provider and local-model integration modules for a terminal overlay derived from the Warp open-source codebase.
- Implement configuration, provider discovery and repeatable overlay tooling for the terminal integration.

EDUCATION

Qualifi Level 8 Diploma in Strategic Management and Leadership | Qualifi | 2021

Higher National Diploma in Computer Science | OSISATECH Polytechnic, Enugu | Upper Credit | 2009

National Diploma in Computer Science | OSISATECH Polytechnic, Enugu | 2005

PROFESSIONAL DEVELOPMENT

Full-stack Software Engineering Intensive | JSM Masterclass Experience | Online | Oct 2022 - Mar 2023
